

COMPARISON

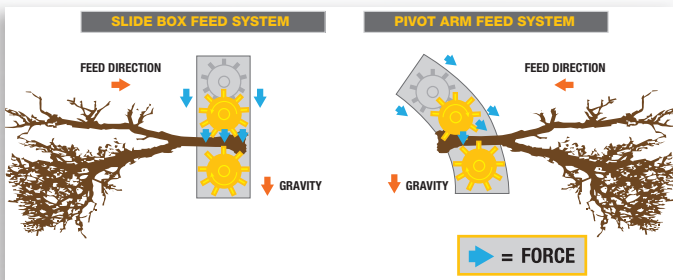

Intimidator 15XP > Morbark 1821

THE BANDIT 15XP HAS A 37" DIAMETER DRUM

compared to the Morbark 30" diameter drum. The drum on the 15XP turns at 1,087 RPM compared to the Morbark drum turning at a faster RPM. A lower RPM drum delivers more torque, requires less horsepower, operates with less vibration and provides better fuel economy

THE BANDIT SLIDE BOX FEED SYSTEM

allows the top feed wheel to move straight up and down, providing direct down pressure on material entering the chipper using down pressure springs and the standard hydraulic lift cylinder. Whereas, the Morbark pivot arm system utilizes a pivoting top feed wheel that moves up and down on an arc away from the chipping drum. There is little direct down pressure, limiting pulling and compressing power causing more chainsaw work and decreased production.

BANDIT DRUMS WARRANTY

All Bandit drums are built to be extremely durable and feature numerous internal baffles and reinforced knife pockets. These drums provide years of dependable service and are backed by an industry best 5 year "GUTS" warranty covering the drums fabricated components. Also covered under this warranty is the feed systems fabricated components.
