

# COMPARISON

*Intimidator 21XP > Morbark 2230*

## THE BANDIT SLIDE BOX FEED SYSTEM

allows the top feed wheel to move straight up and down, providing direct down pressure on material entering the chipper using down pressure springs and the standard hydraulic lift cylinder. Whereas, the Morbark pivot arm system utilizes a pivoting top feed wheel that moves up and down on an arc away from the chipping drum. There is little direct down pressure, limiting pulling and compressing power causing more chainsaw work and decreased production.

## THE INTIMIDATOR 21XP

has greater pulling and compressing power compared to the Morbark 2230. Combined, the 21XP generates around 10,824 pounds of pulling power reducing the need to trim and reposition material into the chipper. Morbark lists their units as having 10,000 lb/ft of pulling power.

## BANDIT DRUMS WARRANTY

All Bandit drums are built to be extremely durable and feature numerous internal baffles and reinforced knife pockets. These drums provide years of dependable service and are backed by an industry best 5 year "GUTS" warranty covering the drums fabricated components. Also covered under this warranty is the feed systems fabricated components.
