

COMPARISON

Bandit 2650 > Carlton 7015

CUTTER WHEEL OPTIONS

The Model 2650 features a 21" diameter x 1-1/4" thick cutter wheel, either as Bandit wheel with Greenteeth or a New Revolution wheel with hex teeth. Bandit offers these two cutter wheel options so customers can choose the best set-up that meets their needs.

Greenteeth Wheel

New Revolution Wheel

BETTER VISIBILITY

The swing-out operator's console on the 2650 is positioned close to the cutter wheel allowing operator's to visually see better while grinding. The console on the Carlton 7015 is positioned further back making it difficult to see while grinding.

REDUCED MAINTENANCE COSTS

The cutter wheel on the 2650 is driven via a hydraulic motor mounted on the side. This hydraulic motor provides high torque while reducing the costs associated with a belt. The Carlton cutter wheels are driven using a drive belt requiring additional maintenance and downtime. The belt on the Carlton's are also engaged via a jackshaft system requiring additional maintenance on the jackshaft bearings and belt. The cutter wheel on the 2650 is simply engaged via a hydraulic pump in turn activating the hydraulic motor.

FEWER TEETH TO MAINTAIN

The 2650 comes equipped with 24 teeth (New Revolution wheel) and 18 teeth (Green wheel) compared to the Carlton's 48 teeth.
