

COMPARISON

Bandit 3100 > Carlton 7500 & Vermeer SC802

BANDIT 3100 > CARLTON 7500

REDUCED MAINTENANCE COSTS

The cutter wheel on the 3100 is driven with a banded belt mounted on the side of the cutter wheel. The Carlton cutter wheel is driven by a belt as well but engaged via a jackshaft system requiring additional maintenance on the jackshaft bearings and belt. The cutter wheel on the 3100 is simply engaged by a hydraulic pump in turn activating the belt to the cutter wheel.

FEWER TEETH TO MAINTAIN

The 3100 comes equipped with 32 or 44 teeth depending on cutter wheel compared to the Carlton's 76 teeth.

A CHOICE OF ENGINE OPTIONS

The 3100 can be equipped with a 74 or 120 horsepower diesel engine or a PSI 165 gas engine. The Carlton is only offered with a Kubota or Kohler 74 HP diesel engine.

BANDIT 3100 > VERMEER SC802

A CHOICE OF ENGINE OPTIONS

The 3100 can be equipped with a 74 or 120 horsepower diesel engine or a PSI 165 gas engine. The Vermeer is only offered with a Deutz 74 horsepower engine featuring 188 ft/lbs. of torque. If a Kohler 74 is selected on the 3100 it features 221 ft/lbs. of torque giving it 33 ft/lbs. more than the Vermeer for added power during grinding.
