

# COMPARISON

*Bandit SG-75 > CARLTON SP7015TRX*

## DURABLE YET LIGHTER IN WEIGHT

The SG-75 weighs over 1,000 less allowing it to travel over softer terrain and yards leaving less of a footprint. For comparison, the SG-75 has a PSI of 4.2 and the Carlton has a ground pressure of 5.3 PSI.

## SIMPLIFIED DRIVE SYSTEM

The cutterwheel on the SG-75 is engaged utilizing an NACD clutch which in turn activates an upper and lower gearbox to drive the cutterwheel. The Carlton utilizes a jack shaft system which requires the bearings and belts to be maintained. There is also a cutterwheel drive belt requiring periodical adjustments and maintenance.

## GREATER CUTTERWHEEL MOVEMENT

The SG-75 has 10" more cutterwheel swing and 8" more depth compared to the 7015TRX reducing the number of times the unit needs repositioned and allowing it to achieve a greater depth.
