

COMPARISON

Bandit SG-40 > CARLTON 5014 NXT

CUTTER WHEEL OPTIONS

The SG-40 features a 18" diameter x 1-1/2" thick cutter wheel, either as Bandit wheel with Greenteeth or a New Revolution wheel with hex teeth. Bandit offers these two cutter wheel options so customers can choose the best set-up that meets their needs.

Greenteeth Wheel

New Revolution Wheel

LESS MAINTENANCE = MORE TIME GRINDING.

The SG-40 is engaged with an electric clutch which in turn activates a hydraulic pump/belt, while the Carlton units utilize a jackshaft system. With no jackshaft components to maintain on the SG-40 customers will spend less time maintaining the unit and more time grinding.

THE SG-40'S CONTROL CONSOLE CAN BE PLACED IN THREE POSITIONS SO OPERATORS CAN GET THE BEST VIEW OF THE STUMP, DEPENDING ON CONDITIONS, LOCATION AND STUMP SIZE.

The Carlton controls located on one side of the machine reducing the flexibility during grinding.

DURABLE AND COMPACT

The SG-40 track is compact and approximately 1,200 pounds lighter compared to the 5014 NXT. This allows the SG-40 to easily be maneuvered in tight locations all while leaving less of a footprint.
