

COMPARISON

Bandit SG-40 > VERMEER SC30TX

HEAD-TO-HEAD, THE MODEL SG-40 WILL OUTPERFORM THE VERMEER.

The SG-40's belt driven cutter wheel provides a smooth aggressive cutting action and the belts are easily adjustable limiting downtime and maintenance costs. The Vermeer SC30TX features a hydraulic motor on the side of the machine to drive the cutter wheel. When a hydraulic motor was tested on the SG-40, it was determined a belt-driven solution was the best set-up for this size and horsepower machine.

THE SG-40'S CONTROL CONSOLE CAN BE PLACED IN THREE POSITIONS SO OPERATORS CAN GET THE BEST VIEW OF THE STUMP, DEPENDING ON CONDITIONS, LOCATION AND STUMP SIZE.

The Vermeer controls are only at the back of the machine, meaning operators will have a limited view of the cutter wheel.

GREATER SWING ARC ALLOWS THE SG-40

to grind stumps reducing the amount of times the unit needs re-positioned. The SG-40 has a 44" wide swing arc compared to the SC30TX's 35 1/2" swing arc.

THE SG-40 IS OFFERED WITH A KOHLER 38 HP EFI ENGINE PROVIDING 58 FT/LBS OF TORQUE COMPARED TO THE SC30TX WITH A KOHLER 25 WITH 42 FT/LBS. THIS EQUALS APPROXIMATELY 38% MORE TORQUE!
